1. THE UNIVERSITY

1.1 Introduction

The Indira Gandhi National Open University was established by an Act of Parliament in 1985 to achieve the following objectives:

- democratising higher education by taking it to the doorsteps of the learners
- providing access to high quality education to all those who seek it irrespective of age, region, religion and gender
- offering need-based academic programmes by giving professional and vocational orientation to the courses
- promoting and developing distance education in India
- setting and maintaining standards in distance education in the country as an apex body.

At present, IGNOU offers around 350 specially need based academic, professional, vocational, awareness generating and skill-oriented programmes, leading to certificates, diplomas and degrees (bachelor’s, master’s and doctoral).

1.2 Prominent Features

IGNOU has certain unique features such as:

- international jurisdiction
- flexible admission rules
- individualised study: flexibility in terms of place, pace and duration of study
- use of latest information and communication technologies
- nationwide student support services network
- cost-effective programmes
- modular approach to programmes
- resource sharing, collaboration and networking with conventional Universities, Open Universities and other Institutions/Organisations
- socially and academically relevant programmes based on students need analysis
- convergence of open and conventional education systems.

1.3 Important Achievements

- Emergence of IGNOU as the largest Open University in the World.

Launch of ‘Edusat’ videoconferencing channel (2 way video, 2 way audio)

Launch of Gyan Vani and other dedicated educational FM channels.

1.4 Organizational Structure
1.5 Instructional Package

IGNOU’s method of instruction differs radically from that of other conventional universities, Indira Gandhi National Open University has adopted a multimedia approach to instruction. The different components being: self– instructional materials, counselling sessions, both face to face and via teleconferencing mode. For courses in science, Computers, Nursing as well as engineering and Technology, arrangements have been made to enable students undertake practical classes at selected study centers.

The university provides a multi-media learning system comprising print, audio, video, radio, television, teleconferencing, interactive radio counselling, internet- based learning and face-to-face counselling

1.6 Course Preparation

Learning material is especially prepared by team of experts drawn from different Universities of all over the country as well as in-house faculty. This material is scrutinized by the content experts, supervised by the unit designers and edited by the language experts at IGNOU before they are finally sent for printing. Similarly and video cassettes are produced in consultation with the course writers, in – house faculty and producers. This matter is previewed and reviewed by the faculty as well as
outside media experts and edited or modified, wherever necessary before they are finally dispatched to the Study Centers and Doordarshan.

1.7 Credit System

The University follows the ‘Credit System’ for most of its programmes. Each credit in our system is equivalent to 30 hours of student study comprising all learning activities (i.e., reading and comprehending the print material, listening to audio, watching video, attending counselling sessions, teleconference and writing assignment responses). Thus, a 4-credit course involves 120 hours of study. This helps the learner to know the academic effort he/she has to put in, to successfully complete a course. Completion of an academic programme (Degree or Diploma) requires successful completion of the assignments, practicals projects and the term-end examination of each course in a programme.

1.8 Support Services

In order to provide individualised support to its learners, the University has a large number of Study Centers, spread throughout the country. These Study Centers are co-ordinated by 62 Regional Centers and Recognised Regional Centers. At the Study Centers, the learners interact with the Academic Counsellors and other learners, refer to books in the Library, watch/listen to video/audio programmes and interact with the Coordinator on administrative and academic matters. The list of Regional Centres is given in this handbook as Appendix I. Support services are also provided through Work Centres, Programme Study Centres, Skill Development Centres and Special Study Centres.

1.9 Evaluation System

The system of evaluation in IGNOU is also different from that of conventional universities. IGNOU has a multi-tire system of evaluation.

1. Self-assessment exercises within each unit of study.
2. Continuous evaluation mainly through assignments which are tutor-marked, practical assignments and seminar/workshops/extended contact programmes.
3. The term-end examinations.
4. Practical or Project works

The evaluation of learners depends upon various instructional activities undertaken by them. A learner has to write assignment responses compulsorily before taking term-end examination from time to time to complete an academic programme. A learner has to submit TMA responses to the Coordinator of the Study Centre concerned to which s/he is attached. A learner should keep duplicate copies of assignment responses of TMA that may be required to be produced at Student Evaluation Division on demand. Term-end examination is conducted at various examination centres spread all over the country and abroad in June and December.

1.10 Implementation Plan

Programme will be implemented through a network of study centres located in Schools and NGO. A team of teachers called as Academic Counsellors are trained to take contact sessions at study centres. This involves face-to-face counselling. Clinical supervisors will help in practicals i.e., supervised
activity at schools. Self-activities are carried out by the learner at their workplace. The Administrative control is through the regional centres in the states, RSD, School and IGNOU HQ at New Delhi.

1.11 Common Terminologies used in Distance Learning

As a distance learning student it is important for you to familiarize yourself with the following terminologies which would be commonly used while you are pursuing this programme.

**Programme**

By a programme, we mean the curriculum or combination of courses in a particular field of a study. For example, Certificate in Competency Enhancement for ANM/FHW, Post-Basic B. Sc. Nursing Programme, Post Graduate Diploma in Maternal and Child Health, Health Care Waste Management. Diploma Programme in Management, Diploma Programme in Distance Education, M.A. English etc.

**Course**

The programme is divided into courses. In conventional system of education, when we talk of a course, we usually refer to a “subject” and “level” such as fundamentals of postgraduate chemistry, primary level maths, undergraduate biology and so on. In distance education, the term course includes more than this. It is used to describe the teaching materials and other components of the study. A typical distance education course will, for example, consist of a number of booklets of printed material, audio and video components, counselling/contact sessions, assignments, library work, laboratory work, project work etc.

Thus, each course consists of a few printed booklets called blocks, a few audios, a few videos, some assignments and whatever else may go with i.e., your programme consists of two theory courses and one practical course.

Theory course -1 titled **Fundamentals of Adolescence** and Theory Course – 2 is named as **Issues & Challenges during Adolescence**
**Block**

A course is divided into blocks. The block appears in the form of a booklet of around 60/80 printed pages. Generally, each block represents one untitled theme e.g., Certificate in Adolescent Health and Counselling programme has four blocks in each theory course and title for block -1 of theory course -1 is fundamental of adolescents.

The text material is sent to the learners in the form of blocks as a learner may feel a greater sense of achievement each time s/he completes a block. A single big book can be threatening from the pedagogic point of view.

| Remember that each course consists of a few blocks which appear as booklets. |

**Unit**

The term unit, of course, in the context of IGNOU, is used to denote a division of a block, at one level in terms of the theme or topic/a lesson and at another level as the material used to teach the topic.

Each unit is broken into sections and sub-sections for the clarity of the presentation of concepts, information, illustrations etc.

Each unit is, thus an individual lesson and fits into the block it belongs to.

**Credit**

In IGNOU, the student study hours are measured in credit systems. One credit is equivalent to 30 learning hours. Each block of your theory represents one credit i.e., a learner on an average would require 30 hours to complete reading a block and attempting the associated assignments.

**Study Centres**

Although the Open University system demands a student to work mainly at home, face-to-face interaction is also essential. This face-to-face interaction serves to solve administrative as well as academic problems faced by the students. To facilitate this, study centres are chosen all over the country. Study centres function under the regional centres. For professional programmes study centers are established.

**Programme Study Centre**

For professional programmes, Programme Study Centres (PIC) are established which also function under the Regional centres of IGNOU.

**Academic Counsellor**

Teachers identified and trained in the programme offered by IGNOU to guide the students for theory and practical training.

**Academic Counselling**

It encompasses all types of teacher-learner interaction that are aimed at facilitating learning. Such interaction may mainly be tutorial in nature with various aspects of counselling featuring in between.
However, sometimes interaction may exclusively be in the nature of counselling. Such counselling may be at (i) the pre-enrollment or pre-entry stage, (ii) the stage of induction into a programme, (iii) the stage of submitting the first assignment, (iv) the stage of initiation into any new activity such as a lab-course, a hands-on experience in a computer programme, preparation of a project-proposal etc. (v) the pre-exam stage and (vi) the post-programme stage.

While tutorial interaction is subject-centered (Centering around presentation, exposition, explanation, illustration, demonstration and other pedagogical activities related to the course-content), counselling is learner-centered seeking to help learners identify their individual problems, the causes behind such problems and the means and ways of overcoming or circumventing such problems so as to enhance the possibilities of effective learning. Academic counselling may be provided in face to face situation, through tutor comments on assignment-response, through correspondence or over telephone and interact where possible.

**Assignment**

A learning task (consisting of essay type questions, or short answer questions, or an activity, or a project, etc.) that a distance learner undertakes during his/her studies. At IGNOU, besides being used as a means of didactic communication, it is used as an instrument of continuous assessment that carries 30% weightage of final score. The assignment can be of two types: Tutor Marked Assignments (TMAs) and Computer Marked Assignments (CMAs). Obviously, assignments are used for two purposes: to provide guidance through tutor comments, and to assess learner achievement through grading / marking.
