

BACHELOR OF COMPUTER APPLICATIONS (BCA)

(Revised Syllabus)

BCA(Revised Syllabus)/ASSIGN/SEMESTER-I

ASSIGNMENTS

(July - 2026 & January - 2027)

FEG-02, ECO-01, BCS-011, BCS-012, BCSL-013

**SCHOOL OF COMPUTER AND INFORMATION SCIENCES
INDIRA GANDHI NATIONAL OPEN UNIVERSITY
MAIDAN GARHI, NEW DELHI – 110 068**

CONTENTS

Course Code	Assignment No.	Submission-Schedule		Page No.
		For July-December Session	For January-June Session	
FEG-02	BCA(I)/02/Assignment/26-27	31st October, 2026	30th April, 2027	3
ECO-01	BCA(I)/01/Assignment/26-27	31st October, 2026	30th April, 2027	5
BCA-011	BCA(I)/011/Assignment/26-27	31st October, 2026	30th April, 2027	6
BCS-012	BCA(I)/012/Assignment/26-27	31st October, 2026	30th April, 2027	9
BCSL-013	BCA(I)/L-013/Assignment/26-27	31st October, 2026	30th April, 2027	11

Important Notes

1. Submit your assignments to the Coordinator of your Study Centre on or before the due date.
2. Assignment submission before due dates is compulsory to become eligible for appearing in corresponding Term End Examinations. For further details, please refer to BCA Programme Guide.
3. To become eligible for appearing the Term End Practical Examination for the lab courses, it is essential to fulfill the minimum attendance requirements as well as submission of assignments (on or before the due date). For further details, please refer to the BCA Programme Guide.

Course Code	:	BCS-012
Course Title	:	Basic Mathematics
Assignment Number	:	BCA(I)012/Assignment/2026-27
Maximum Marks	:	100
Weightage	:	25%
Last Date of Submission	:	31st October, 2026 (For July 2026 Session)
	:	30th April, 2027 (For January 2027 Session)

Note: This assignment has 20 questions of 80 marks (each question carries equal marks). Answer all the questions. Rest 20 marks are for viva voce. You may use illustrations and diagrams to enhance explanations. Please go through the guidelines regarding assignments given in the Programme Guide for the format of presentation.

Q1: If $A = \begin{bmatrix} 3 & -1 \\ 2 & 1 \end{bmatrix}$, show that $A^2 - 4A + 5I_2 = 0$. Also find A^4 .

Q2: Solve the following system of equations using the matrix inverse method:

$$3x + 4y + 7z = 14$$

$$2x - y + 3z = 4$$

$$2x + 2y - 3z = 0$$

Q3: Use principle of Mathematical Induction to prove that:

$$1/(1 \times 2) + 1/(2 \times 3) + \dots + 1/[n(n+1)] = n/(n+1)$$

Q4: If the p^{th} term of an A.P. is q and the q^{th} term of the same A.P. is p , find its r^{th} term.

Q5: How many terms of the G.P. $\sqrt{3}, 3, 3\sqrt{3}, \dots$ add up to 39?

Q6: Find the sum of all integers between 100 and 1000 that are divisible by 7.

Q7: If $1, \omega, \omega^2$ are the cube roots of unity, show that: $(2 - \omega)(2 - \omega^2)(2 - \omega^{19})(2 - \omega^{23}) = 49$

Q8: Use De Moivre's theorem to find the value of $(\sqrt{3} + i)^3$

Q9: If α and β are the roots of $x^2 - 3ax + a^2 = 0$, find the value of a when $\alpha^2 + \beta^2 = 7/4$.

Q10: If α and β are the roots of $2x^2 - 3x - 5 = 0$, form the quadratic equation whose roots are α^2 and β^2 .

Q11: Solve the equation: $x^3 - 13x^2 + 15x + 189 = 0$, given that one root exceeds another by 2.

Q12: Solve the inequality and graph its solution: $2/(x - 1) > 5$

Q13: If $y = \log[(\sqrt{1+x} - \sqrt{1-x})/(\sqrt{1+x} + \sqrt{1-x})]$, find dy/dx .

Q14: If $y = ae^{mx} + be^{-mx}$, prove that: $d^2y/dx^2 = m^2y$

Q15: Determine the intervals in which $f(x) = x^4 - 8x^3 + 22x^2 - 24x + 21$ is increasing and decreasing.

Q16: Find the points of local maximum and local minimum of: $f(x) = x^3 - 6x^2 + 9x + 2014$

Q17: Evaluate: $\int x^2 \sqrt{5x - 3} \, dx$

Q18: Using integration, find the length of the curve $y = 3 - x$ from $(-1, 4)$ to $(3, 0)$.

Q19: Find the scalar component of projection of the vector $\mathbf{a} = 2\hat{i} + 3\hat{j} + 5\hat{k}$ on the vector $\mathbf{b} = 2\hat{i} - 2\hat{j} + \hat{k}$.

Q20: A tailor needs at least 40 large buttons and 60 small buttons. A box contains 6 large and 2 small buttons, and a card contains 2 large and 4 small buttons. If the cost of a box is \$3 and the cost of a card is \$2, formulate and solve the problem as a linear programming problem to minimize expenditure.
