

Guidelines for doing Assignments

It is worth keeping in mind the following points while attempting the Assignments:

Planning: Go through the assignments very carefully. Read the units on which they are based. Note important points regarding each question and then rearrange it in a logical order.

Organization: Be cautious, selective and analytical before drawing up a rough outline of your answer. In long answers, give adequate consideration to the introduction and conclusion. Introduction should have a brief understanding of the question and then how you intend to develop it. The conclusion should summarize the answer to your question. The answers should be sound, clear, within word limit and express your understanding of the subject.

Presentation: Once you are satisfied with your answer, you can write down the final version for submission; write each answer neatly and highlight/underline the points you wish to emphasize.
