## MASTER OF COMPUTER APPLICATIONS (MCA-NEW)

# Term-End Practical Examination December, 2024

### MCSL-229(Set-III) : CLOUD AND DATA SCIENCE LAB

Time: 2 Hours Maximum Marks: 50

Note: (i) There are two Sections in this paper.

- (ii) Each Section is of one hour duration.
- (iii) Each Section has one compulsory question of 20 marks.
- (iv) Each Section has 5 marks for viva-voce.
- (v) Attempt only those Section(s) in which you are not successful as yet.

#### Section—A

#### (Cloud Computing Lab)

 (a) Create a presentation of at least 10 slides using Google slides on the topic of cloud service models (IaaS, PaaS, SaaS). Store this presentation on the Google drive and provide permission to view this presentation.

(b) List the steps involved in creating a virtual machine using Oracle VirtualBox. 10

### Section—B (Data Science Lab)

2. Perform a linear regression analysis in R to find the relationship between time spent on social media (hours per day) and productivity score (out of 100) for the following data: 20

Time on Social Media (hours)	Productivity Score
1	85
2	80
3	75
4	65
5	60
6	50
