

**CERTIFICATE PROGRAMME IN
FUNCTIONAL ENGLISH (CFE)**

Term-End Examination

June, 2025

BEG-005 : ENGLISH IN EDUCATION

Time : 3 Hours

Maximum Marks : 100

Note : *All questions are compulsory.*

1. Read the passages given below and answer the questions that follow :

Technology has brought many changes to education in the modern age. It has revolutionized the way we learn, and has made education more accessible and engaging for students of all ages.

One of the biggest impacts of technology on education is the ability to access vast amounts of information. With the internet,

students can now access a wealth of resources on any topic at any time. This has made learning more efficient and effective, as students can learn at their own pace and explore topics that interest them.

In addition, technology has made education more interactive and engaging. Educational games, simulations, and virtual reality experiences are just a few examples of how technology is being used to make learning more fun and memorable. Students can now take part in virtual field trips, conduct scientific experiments in a virtual lab, and even explore historical sites from around the world without leaving the classroom.

Furthermore, technology has made education more accessible to students with disabilities. Assistive technology, such as screen readers, speech-to-text software, and braille displays, can help students with

visual or hearing impairments participate fully in the learning process.

However, it is important to note that technology should not be viewed as a replacement for teachers. While technology can enhance the learning experience, teachers play a critical role in guiding and supporting students. Teachers can help students understand how to use technology effectively, and can provide individualized feedback and support that technology cannot replace. In conclusion, technology has had a significant impact on education in the modern age. It has made learning more accessible, interactive, and engaging, and has opened up new possibilities for students of all ages. However, it is important to use technology wisely and to recognize that teachers play a critical role in the learning process.

Questions :

- (i) How has technology made education more efficient and effective ? 3
 - (ii) Give examples of how technology is being used to make learning more fun and memorable. 3
 - (iii) How has technology made education more accessible to students with disabilities ? 3
